

INSULATED GLASS UNIT (IGU) COMPLIANCE FORM

It is the responsibility of both the IGU manufacturer and window fabricator or installer to ensure compliance to Australian Standard AS 4666:2012 Insulating glass units. In order to supply the correct product and to avoid warranty or defect claims, please fill out this form and return.

Date: _____

Customer: _____

Customer purchase / order No or National Glass Quote reference No: _____

Please tick the boxes for the following;

1. Select which secondary sealant required

Polysulphide

Silicone

(Additional lead time required)

2. Structurally glazed or any edges exposed Yes No

3. Spandrel glazing Yes No

4. Skylight glazing Yes No

5. Units installed at 800 metres above sea level Yes No

Material compatibility

Ensure your setting/glazing blocks, glazing rubbers, sealants for wet glazing and primers in the case of timber joinery are compatible with IGU sealants and materials we use. If the materials used are not compatible, this could lead to premature failure of unit or voiding of warranty.

For more information on material compatibility refer to our IGU Glazing and Material Compatibility document on next page.

Wind loading

Incorrect selection of glass thickness or spacer width can lead to failures or visual defects.

GLASS ID LABELS

The label **DOES NOT** indicate which way to glaze the panel. We simply state on the label as shown, which glass we have affixed the label to. In this example, the label is on the **Acousta™ 6 LAM** glass component. Once the unit is delivered, it's the responsibility of the fabricator/installer to correctly glaze to ensure performance outcomes are met.

IGU Glazing & Material Compatibility

(See also IGU Design & Glazing Notes document V11, 2024)

This document contains very important information relating to the correct glazing specifications for insulating glass units (IGU) produced by National Glass. Failure to comply with these specifications will void the National Glass warranty and severely limit any liability National Glass may have for the product.

As a customer or purchaser of National Glass IGU's some of the key items for consideration include;

- > as a window manufacturer or glazier, ensuring compliance to AS/NZS 4666:2012 Insulating glass units;
- > checking the compatibility of glazing/setting blocks against recommended materials listed below;
- > checking the compatibility of timber window primers or agents;
- > adhering to the list shown of compatible glazing sealants.

AS/NZS 4666 INSULATING GLASS UNITS

Insulating Glass Units shall be installed in accordance with the glazing requirements of AS/NZS 4666 unless otherwise specified. This standard sets out requirements and guidelines for the long term testing, glazing, periodic manufacturing testing and other associated aspects in relation to IGU's.

GLAZING / SETTING BLOCKS

- > polyethylene "PE" or polypropylene "PP" are recommended.
- > polyamide (reinforced with fiber glass) may also be used.
- > silicone blocks for silicone secondary seal.

Aromatic synthetic material is to be avoided, e.g. polystyrene "PS", acryle butadienstyrole copolymere "ABS" or any other polyblends or copolymers. The use of blocks made of PVC must also be avoided due to the risk of plasticiser migration. No plasticiser containing layers (no rubber, EPDM based glazing blocks or layer) may be used as glazing blocks.

The minimum width of each setting block shall be not less than 3mm greater than the unit and setting blocks shall be located to equally support all panes of glass and shall be fixed to prevent displacement during installation and service. The size, number and location of setting / location blocks and distance pieces shall be in accordance with AS/NZS 4666.

TIMBER WINDOW PRIMERS/AGENTS

It is the responsibility of the timber joiner/window supplier to ensure any primer/agent or paint material that could come in direct contact with IGU edges and sealants are compatible with the materials used in all National Glass IGU's.

IGU SECONDARY SEALS

National Glass manufacture IGU's with dual seals, primary and secondary. The primary seal is PIB (polyisobutylene) and the secondary seal is either polysulphide or silicone sealants. Unless specified or stated at time of order or enquiry, units are supplied with polysulphide secondary. This material is suited for fully framed applications. It is not suited for units with exposed edges. For exposed edges, silicone must be used and must be specified at time of order or enquiry.

- > structural glazing - including 90° butt joints, stepped units must be specified with silicone as the secondary seal;
- > spandrel IGU's - for applications using spandrel coloured glass, units must be specified with silicone as the secondary seal.

FIG.1: IGU

IGU Glazing & Material Compatibility

(See also IGU Design & Glazing Notes document V11, 2024)

SEALANT COMPATIBILITY - POLYSULPHIDE SECONDARY SEAL

The following list of sealants for glazing of units are considered compatible with a polysulphide secondary seal. Polysulphide secondary seals are the default seal for fully framed units produced by National Glass. If units are structurally glazed, or with any exposed edges or spandrel panels, silicone must be specified at time of order as the secondary seal. (Refer to silicone compatibility list in this document).

SEALANT COMPATIBILITY - POLYSULPHIDE SECONDARY SEAL (Continues)

Testing period	Sealant	Base	Supplier	Curing	Approval
2021 2nd quarter	Elastosil 8000 N, transparent	Silicone	Wacker	neutral	IFT
2022 2nd quarter	Mastic silicone S, translucent	Silicone	Wurth	neutral alcoxy	IFT
2021 3rd quarter	Neutral Silikon A8 PRO, transparent	Silicone alkoxy	Wurth	neutral	IFT
2019 3rd quarter	Colla di montaggio, beige	neoprene	Wurth	neutral	IFT
2019 3rd quarter	Serramento Wd,Mtl,PVC, alluminio	Silicone alkoxy	Wurth	neutral	IFT
2018 4th quarter	Serramento Wd,Mtl,PVC, black	Silicone alkoxy	Wurth	neutral	IFT
2019 3rd quarter	Serramento Wd,Mtl,PVC,c,bianco puro	Silicone alkoxy	Wurth	neutral	IFT
2020 2nd quarter	Zeta Foam Flex, white	Polyurethane 1K	Zetachem	moisture	IFT

SEALANT COMPATIBILITY - SILICONE SECONDARY SEAL

The following list of sealants for glazing of units are considered compatible with a silicone secondary seal.

Testing period	Sealant	Base	Supplier	Curing	Approval
2022 2nd quarter	Dowsil 3363, black	2K secondary Silicone	Dow	2K, neutral	IFT
2021 3rd quarter	Dowsil 939, black	2K secondary Silicone	Dow	2K, neutral	IFT
2020 4th quarter	Dowsil 335 Butyl Sealant Special Black	Polyisobutylene	Dow	none	IFT
2020 4th quarter	Dowsil 335 Butyl Sealant Black	Polyisobutylene	Dow	none	IFT
2021 4th quarter	Dowsil 121, black	Silicone 2K	Dow	neutral	RAL-IFT
2021 1st quarter	Dowsil 776 Instantfix WB , black	Hybrid Polymer	Dow	neutral	RAL-IFT
2019 3rd quarter	Dowsil 580, grey	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 580, white	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 580, black	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 795, black	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 795, grey	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 688, black	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 688, grey	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 790, grey	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 790, black	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 791, black	Silicone	Dow	neutral	IFT
2019 3rd quarter	Dowsil 791, grey	Silicone	Dow	neutral	IFT
2020 1st quarter	Dowsil 895, black	Silicone	Dow	neutral	IFT
2020 2nd quarter	Dowsil 896, white	Silicone	Dow	neutral	IFT
2020 4th quarter	D813, grey	Silicone	Dow	neutral	IFT
2018 4th quarter	DC 799EU, transparent	Silicone	Dow Corning	neutral	IFT
2019 1st quarter	DC 994, black	Silicone 2K	Dow Corning	2K	IFT
2017 4th quarter	DC 799, transparent	Silicone	Dow Corning	neutral	IFT
2019 1st quarter	DC 993, black	Silicone 2K	Dow Corning	2K	IFT
2019 1st quarter	DC 3363, black	Silicone 2K	Dow Corning	2K	IFT

SEALANT COMPATIBILITY - SILICONE SECONDARY SEAL (Continues)

Testing period	Sealant	Base	Supplier	Curing	Approval
2017 4th quarter	Insta-Stik Windows, beige	Polyurethane 1K	Dow Corning	moisture	IFT
2018 3rd quarter	Dowsil 796, white	Silicone	Dow Corning	neutral	IFT
2018 3rd quarter	Glass&metal sealant, white	Silicone	Dow Corning	neutral	IFT
2019 1st quarter	DC 744, white	Silicone	Dow Corning	neutral	IFT
2019 1st quarter	Dowsil 121, black	Silicone 2K	Dow Corning	neutral	IFT

Testing period in bold: up to one year tested
Testing period in grey: more than 4 years tested

VALIDITY: 5 years from testing period shown.

DISCLAIMER: All sealants listed in the document are valid only for tested materials. Since National Glass has no control over the manufacture or formulation of materials, we make no guarantees of results and assume no liability for damages incurred by following the recommendations.
